DISCLAIMER AND/OR LEGAL NOTICES:

Every effort has been made to accurately represent this products potential. Even though this industry is one of the few where one can write one's own cheque in terms of earnings, there is no guarantee that you will earn any money using the techniques and ideas in these materials. Examples in these materials are not to be interpreted as a promise or guarantee of earnings. Earning potential is entirely dependent on the person using our product, ideas and techniques. This does not purport to be a "get rich scheme".

Any claims made of actual earnings or examples of actual results can be verified upon request. Your level of success in attaining any results claimed in our materials depends on the time you devote to the program, ideas and techniques mentioned and your finances, knowledge and various skills. Since these factors differ according to individuals, we can neither guarantee your success or income level, nor are we responsible for any of your actions.

Any and all forward looking statements here or on any of our sales materials are intended to express our opinion of earnings potential. Many factors will be important in determining your actual results and no guarantees are made that you will achieve results similar to ours or anybody else's. In fact no guarantees are made that you will achieve results from the ideas and techniques in our material.

Neither BetBotPRO, nor anyone associated with BetBotPRO accepts any responsibility what so ever for any loss that may be sustained as a result of the use (or misuse) of The BetBotPRO Software, irrespective of how that loss might be sustained. BetBotPRO does not guarantee winnings and cannot be held liable for losses resulting from the use of information obtained from within this document or sites, or use of The BetBotPRO Software.

Although this automated software has been extensively tested prior to release we cannot accept liability for any malfunction, it is expected that the program will be supervised at all times during operation by the license owner.

Warning

Betting can be very risky and users should only speculate with money that they can comfortably afford to lose, and should ensure that the risks involved are fully understood, seeking advice if necessary.

Be responsible about gambling https://www.gambleaware.co.uk

Introduction

Welcome to the Betbotpro software and thank you for having the foresight to purchase this software. I'm sure you will be extremely pleased once you start seeing the potential of the software and how it can help you in taking daily amounts from Betfair much more consistently.

I initially designed the software from a quest to find strategies that worked in the greyhound racing market. Liquidity doesn't enter the market until a few minutes before the race start and so you had to be at your pc to place a bet or monitor the race. Now there are other applications out there but they are usually only available for expensive recurring monthly fees so I wasn't interested. I decided to design my own program with the functions I required and here is the result of many years work.

This will be just the beginning and hopefully based on your feedback we can improve the bot software and include other new features.

Please make sure you read everything so you understand the functions and operation of the software fully. If you have any questions please don't hesitate to email or use the forum via the members area.

The secret to success is not being greedy, accepting a sensible profit target everyday depending on your risk and bank available & limit your losses. Losses are inevitable but if you treat it like a business, they are *simply business expenses*. Aiming to be profitable in the longer term is what you're after, finding that edge.

One thing you will notice when running the software is that profits can build up quickly. Remember they can also be taken away quickly so don't get greedy and take your profit and call it a day.

There are so many strategies you can use it's impossible to cover all of them. You can use your own system, or simply follow a lay tipster's recommendation. You could also lay the tips given by a back to win tipster that has a terrible record.

With greyhounds you can lay the dog with the fastest time, slowest time etc. by looking at the form cards on racingpost.com or Betfair. You could lay all dogs in Trap1 or lay all favourite dogs between certain odds. The choice is really endless.

Pre-Requisites

You need a Windows based PC with Microsoft .Net 4.7 installed.

You most likely already have .NET installed but you can download that here if required:

https://dotnet.microsoft.com/download/thank-you/net472

You also need a screen resolution of 1280x1024 otherwise problems occur.

If you can't see the settings panel you should increase your resolution or re-size the bot window.

You should download the setup program to your desktop or downloads folder.

Double click the Betbotpro-setup.msi file to start the bot installation.

Enter your activation token in the box provided to validate your license. If you don't have an activation token key you can run a trial.

Please take time to read this manual and watch the videos to get the most out of the software.

Two or more instances of the software can be run if required.

You can simply click the desktop icon again to run another instance or click launch new instance from with in the software Instance tab .

You can run multiple bots on the same account or place manual bets as well as run the bot.

If you want to run additional copies on other computers then an additional license can be bought from the member's area/website at <u>www.betbotpro.com</u>.

Quick Start

1.Download the install setup program to your desktop. Run the installer by double clicking it. This will install the software. Just follow the prompts.

2.Run the software by clicking the desktop shortcut.

4.Login with your Betfair user name and password (You must have a funded Betfair account to login, if you have no funds an error will occur. Your Betfair name also has to be registered else you get a "login unauthorised" error)

Click Install to begin the installation. If you want to review or change any of your installation settings, click Back. Click Cancel to exit the wizard.	
Advanced Installer 	

You will now see a shortcut on your desktop. Simply double click to run the software.

Software Activation

When you first run the software you will be able to run it as a trial, simply enter your Betfair user name and password.

You should un-install any previous versions before installing a new version.

If your trial has expired or you have just purchased the software you will need to enter an activation token. You can purchase the software by clicking the Buy now button or going to <u>https://www.betbotpro.com</u>

If this is the first time you have run the software you can request a trial by entering your email address and clicking Request Trial. A trial token will then be emailed to you. Simply enter the token in the box at the bottom and click Register.

	Cogin :: Untitled#022	x

	Licence expires in 6913 days, 7 hours, 9 minutes.	Buy	
	v. 5.27.0.0	Status Service	

To activate the software enter your token. You will receive the token by email after you have purchased or requested a trial.

Once activated you will see that you are using the full version and the login box will be available to enter your Betfair details.

Un-Installing

You should not have to un-install the current installation of Betbotpro if you want to upgrade.

To un-install go to programs menu, find Betbotpro and select un-install. You can also un-install from the windows control panel, add/remove programs.

Move Software to a New Computer

In the Register menu you can check your activation code and Deactivate your license if you need to move it to another PC.

Betfair Notice:

Dear Betfair Software Vendor,

We are writing to you as a Vendor who offers a simulation mode as part of their software offering.

We ask that you make your customers aware that the simulation mode makes real requests for live Betfair data.

This is important from a Data Request charge and an efficiency point-of-view.

It should be made clear that the functionality (like any feature of the software) is offered as a tool to aid bet placement and not intended for long term data analysis.

If customers wish to test strategies, they should instead use the Historical Data services made available via <u>http://data.betfair.com/</u> or <u>http://www.fracsoft.com</u> – rather than relying on the live system.

This is a much more efficient way for Betfair to provide such data.

Getting Started

Once you have double clicked on the Betbotpro shortcut file on the desktop to start the bot you will need to login to you Betfair account shown below:

🖳 Login :: Test 2	×
Username	Your Betfair Name
	remember 🗹
Password	******
	Use IE Proxy Settings
Instance Manager	- Login
Updates Checking for updates	
Registration You are using the full versi	on.
VWX4-CPYQ-PGZN-2ZBQ	EM58-3VZI-K2TA
Buy now	Enter Key
v. 4.3.18	Status Service

Simply enter your Betfair user name and password.

You can decide to remember your user name by ticking the box. Leave Use IE proxy settings un-ticked unless you are behind a proxy server on your network in which case you can use the IE proxy settings.

Basic Layout

The bot consists of 4 areas:

- 1) The top menu area showing the account information, the 'Start/Stop' button, simulation mode and the 'Load Races' button. There are also other tabs called Settings, Instance & Tools.
- 2) The main area showing all the races, events, results and profit/loss.
- 3) The right area showing all the bet options. This is split into multiple sections. Stake Plans, Selections & Bet Settings
- 4) The bottom area to see the runners and odds, any bets placed, market event details & reasons for bets not being placed.

_

Loading Races/Events

Firstly you need to decide what markets or events you want to load. Greyhound racing only, Horse racing only, Horse and Greyhound races, Football, Tennis etc.

Click load new markets.

2						:: BetBotPRO	:: "Test 2"	STOPPED	LIVE	BACK	
	Home	S	iettings		Instance	Tools		Status	Mode	Bet Type	^
© Stopped	Live mode	Load new markets	Advanced Select	All Invert	25 February 2013 16:25:40 (UTC)	21 min.	UK Wallet £300.94 AUS Wallet £0.00	Exposure £0.00 Wallet £0.00		.10	

Select the tick box for the countries/markets you intend to use - Greyhounds, Horses, Soccer or tick any combination of them. It is advisable to stick to one market at a time due to possible event times conflicting.

Check the type of market you want like Win markets or Place markets (each way markets).

				Start	Coun *	TTUTTING.	Num	SP Be	Menu	Dista	ExtraE	RaceNu
ountries	GBR - ×	1	Greyhound Racing									
	Greyhound Racing • ×											
acing Filters												
vent Names	* ×

		P	Not Contains([Mar	lath lancel	Discosi?) A	ad Nat C	antaine//ht	a skathlare a	1 'Ennert	D And IE	ntTransl - '	4 E.G. 50
			V Not Contains([war	keuvamej	, Placed) A	na Not Ci	ontains([ivi	arketivame	g, Porecast) And [Eve	intrype] =	4 COIL FII

You then need to click the 'Load' button. After a short delay all the events, in this case for UK & Irish Greyhound races appear in the main area.

In order for the bot to be functional it has to collect the runner names for each race.

This procedure won't take long, so automatically after all the races have been loaded, the bot starts to collect the runner names from Betfair for one race at a time.

When the background colour of a row becomes white, the runner names for the corresponding race have been collected. This procedure is required at the beginning of each day, and should take less than a minute to load all races.

Notice that all the times shown are in GMT/UTC. You can change Time zone in the Tools Menu.

If you click on the Selections tab on the right hand side the selections panel opens.

If you click on an events row you will notice that a list of runners appears on the right area under the selections tab.

Selecting your runners

There are various options for the selection of bets.

- 1. You can select runners using an automated selection process, like an ordered favourite.
- 2. You can select single or multiple manual selections of your choice.
- 3. You can select multiple automated selections like 1st and 2nd favourites.
- 4. Strategies can also be used to select selections.
- 5. Import selections from csv file or The Betplan.

Back/Lay the numbered favourite:

Tick the races you want to monitor on the left. These races will be selected to place a bet on a favourite.

You can tick all the races at once by pressing the 'All' button. You will invert the selected races with the 'Invert' button.

	2. Ultimate W. 6. Rosina Jay		38.00			40.00											
- -	 c. Kosina Jay 		/5.00														

Peacemaker has been selected here. You do not need to tick the event row tick box.

If a manual selection is made the race/event tick box will turn to an icon for that race so that you know a selection has been made. You can only select individual selections for a race OR one of the favourites, NOT both. You will notice the selection toggle if you try to do both.

		25 February 17:38	•	00000 00000	Monm	A4 480m	
	~	25 February 17:47	•	51 10 10 10	Swin	A4 480m	
•	Ξ	25 February 17:56	•		Monm	A6 480m	

Icon squares indicate a specific/named selection has been made rather than a favourite

The manual selection bet can be excluded or included if it is an xth ordered favourite. So you can exclude the selection if it was the favourite for instance, or only include it if it was the favourite.

Underneath the ordered favourite selection box is another numbered box. This allows you to select multiple favourites or how many favourites from the selected favourite. So 1st fav and the number 2 will select the first two favourites. See the favourite box description further down for more details. In the above example we will be betting on the 3rd and 4th favourites.

The selected runners (as a result of one of the above options) will be shown under the 'Market Bets' panel only when the current time is xx seconds before the race start, and xx is the 'Secs before place a bet' option (Bet Settings Panel/Betting Settings).

For any bet to be placed, a few things must happen:

A) The selection price is less than 'Maximum Price' and more than 'Minimum Price' (Bet Settings/Selections tab).

B) The 'Bot Status' (top area) is **Running**. This is accomplished by pressing the 'Start' button (top area).

C) Also any other criteria you filter like number of runners, % back/lay ratio must also be within range for a bet to be placed.

The status of the market is shown by the Market Events panel. ie. Market closed, suspended etc

The above picture shows that two bets were placed and settled. The Market Bets panel shows the two selections which were 1st and 2nd favourites at the time specified.

The panel also shows the bets and the prices that were matched.

Keeperhill Euro was matched fully at 3.75 and Silverhill Lass was matched at 4.70.

Oakhill Rosie won this race. Pure fluke!

Bet type B = Back Bet type L = Lay

Status S = Settled Status M = Matched Status U = Unmatched

You can see the times in the Market Events panel the race was active, suspended and closed.

When the profit/loss for a race is available from Betfair, it appears under the 'Profit/Loss' column and updates the account information and possibly the next stake value depending on the staking set.

Betbotpro Top Menu Options This section will run through the options available on the top menu.

Home Menu

Start/Stop Button

Toggling this button starts or stops the bet placement. The status will change top right when you click this to show you instantly if the software is running or not.

Simulation/Live Button

Toggling this button will change the mode from simulation to live mode. The change will be instant and the status will show you top right what mode you are in.

Simulation mode is basically like paper trading or testing with no real money used. Live mode will place bets with real money from your account.

Back/Lay Button

Clicking this button will toggle between placing back bets or placing lay bets.

Load New Markets

This will bring up a load markets window where you can select the markets or events you want to bet on for the day.

Advanced Select

You can select the races by using an advanced selection process. Tick races by meeting and custom filters etc.

Account Information

Your account information is displayed here as well as the day's profit/loss in the bot wallet.

Start/Stop Button

Toggling this button starts or stops the bet placement. The status will change top right when you click this to show you instantly if the software is running or not.

When you change modes they will be applied immediately so please be careful.

You can change from Sim to live mode via the Home Menu button or under the Betting Settings options.

When in simulation or live mode it will tell you in the top of the status window.

STOPPED	SIMULATION	BACK	
Status	Mode	Bet Type	

When the simulation mode is on the software will do pretty much everything as normal except a bet won't actually be placed.

The results in simulation mode are not as reliable as they are in live mode.

In live and sim mode the p/l comes from the settled bet in your account, while the winner results also come from the betfair api.

You can also see results here:

http://rss.betfair.com

Sometimes these results are missing or wrong so a result cannot be given but in most cases it works fine.

You can always check the result yourself using <u>https://www.racingpost.com/</u> results for horses or <u>https://www.ukdogracing.net</u> for the greyhounds.

Also fast results here for many sports: https://www.sportinglife.com/racing/fast-results

Back or Lay Button

Clicking this button will toggle between back bets and lay bets. A global setting. You will see the Bet status change as shown below:

1 ¹			:: BetBotPRO :: "Unt	titled#001"	RUNNING	SIM	UTALION	BACK		×

Load New Markets

Load Previous or New markets button

Once the Markets window has loaded you can choose the country you want events/races from.

Once you have chosen the country, choose the event types, like Horse Racing, greyhound racing, Basketball, Cricket, Soccer & Tennis, even Snooker etc. You can pick multiple types although this may not give you the bets results.

Once you have chosen the event you can pick if you want win or place markets (place markets are Each Way markets). You can even pick both. You can also pick Forecast markets or Markets with SP or starting prices available.

e. If you wanted to bet on the Betfair SP prices for a horse to win/lose you would tick Win and SP before loading.

There is a minimum bet size for SP betting, £2 for backing and £10 liability for laying.

See the Betfair help site for more on SP betting http://promo.betfair.com/betfairsp/FAQs_theBasics.html

Load	Can	cel									

Once you have chosen your events and markets you can click the Load button.

Advanced Filtering/Loading

You could choose to load races from certain meetings only by selecting an event name.

 (Select All) 			^
Greyhound Racing - Crayfd			
Greyhound Racing - Sund			
Greyhound Racing - Newc			
Greyhound Racing - Kinsl			-
Greyhound Racing - Sheff			
Greyhound Racing - Crayfd (FC)			v
	01	C	1
	OK	Cancel	Ι.,

Edit Filter

You could also load races with custom parameters. Say in this case we want to load races which are 640m in distance only.

Click the edit filter button. Click the insert or add key + to add a filter.

 Image: Second se		
- [Country] Equals GBR ③ - [Country] Equals IRL ③ - [MenuPath] Contains Sund ③ - [EventType] Equals 4339 ③ OK Cancel Apply	-[MarketName] Does not contain Placed ☺ -[MarketName] Does not contain Forecast ☺ -Or ☺ -[Country] Equals GBR ☺ -[Country] Equals IRL ☺ -[MenuPath] Contains Sund ☺ -[EventType] Equals 4339 ☺	[MarketName] Does not contain Placed ☺ -[MarketName] Does not contain Forecast ☺ -Or ☺ -[Country] Equals GBR ☺ -[Country] Equals IRL ☺ -[MenuPath] Contains Sund ☺ -[EventTune] Equals 4220 ☺ -[Country] Equals <enter a="" value=""> ☺</enter>

Click the country variable and choose MarketName. Click the operator parameter to change to contains. Click the Enter Value parameter and enter 640m.

🖙 Filter Editor			×
And O

Home	Settings	Instance	Tools		Status	Mode	Bet Type	
Running Running	Back Bets Load P	revious Advanced Inve	03 September 2013 rt 12:14:49 (UTC)	85 min.	UK Wallet £254 AUS Wallet £1	8.50 Exposure	£0.00 Next Stake (UK) £6.28 Next Stake (AUS)	£2.00

UK Wallet - This is your Betfair UK account balance, can be in your local currency £/Euro etc.

AUS Wallet - Recently the Aus wallet was removed by Betfair so all funds are now central in the UK wallet.

Exposure - This is shown only in live mode and shows you what liability or possible loss you have with placed bets.

Wallet - This is the profit/loss of the day's bets. This is always reset when you reload races. This does not include commissions.

Next Stake (UK) - This shows the next stake that will be used to place the next bet, depending on what staking plan has been used. Sometimes this is not displayed as the next stake is not known until the last minute depending on the odds of the next selection.

Next Stake (AUS) - This shows the next stake that will be used to place the next bet on AUS markets and events, depending on what staking plan has been used. Sometimes this is not displayed as the next stake is not known until the last minute depending on the odds of the next selection.

Sechedule Settings

Schedule automatically how the bot behaves.

Reload races at 00:00:00
Reload races after profit target hit
Reload races after stop loss hit
Select All Races after reload
Start Bot after reload
Close_Application v when profit target hit
Close_Application v when loss target hit
Close_Application v when number of winners hit
Close_Application v when number of losers hit
Close_Application
0 C at x min. after last race
Apply

Reload races at a specified time - loads the days races automatically at a specified time.

Reload races after profit/loss target hit – can be used to restart the bot after profit/loss is hit.

Select all races after reload - ticks all the race selection boxes automatically after reload

Start bot after reload starts the bot automatically - so in theory it can continue unattended

Shutdown PC/Close Application when profit target hit – turns off the PC or closes program when you hit your Max Profit

Shutdown PC/Close Application when loss target hit – turns off the PC or closes program when you hit the Max Loss

Shutdown PC/Close Application when number of winners hit – turns off the PC or closes program when you hit the number of winners

Shutdown PC/Close Application when number of losers hit – turns off the PC or closes program when you hit the number of losers

Shutdown PC/Close Application at x min after last race – turns off the PC or closes program after last race

You must click APPLY to set the schedule.

Show View

Shows the various windows with in the software. Currently disabled.

Restore Default layout

Restores the layout of the software to the original layout when the software is installed.

This is handy if you lose a window by closing it accidentally.

Toggle Menu Path

This will toggle the path on or off where the Betfair event comes from.

Updates Checking for updates
Registration You are using the full version.
VWX4-CPYQ-PGZN-2ZBQ-EM58-3VZI-K2TA
Buy now Enter Key
v. 4.3.19.0 Status Service

It is possible to run multiple bots on the same Betfair account or multiple Betfair accounts. Be aware of possible data charges from Betfair as per the link in the software.

When logging in always make sure you choose the correct instance. It will remember the last one you used.

You can also create a new instance from Create New.

There is an instance manager where you can edit and unlock any crashed instances. After launching a new instance it will create a new instance name automatically. You can then rename this instance to whatever you like such as greyhound1 or horse strategy 2 or soccer etc.

Cogin :: Untitled#001	×

You can remove or rename instances from here. If you uninstall the program the instances are not removed. So you can uninstall and re-install a new version and your settings and strategies will be saved.

Crashed Instances

If the software crashes or the instance seems locked you can unlock an instance by right clicking the Instance and clicking unlocked. It will then show as an Instance in the Instance menu when logging in again.

Rename Instance

You can rename the running instance of the bot such as greyhound1 or horse strategy or soccer lays.

Test 2		
	Save	

Save Settings

You can save all your settings into a strategy and reload them another time saving a lot of setup time. Remember to s the bot too so you can just reload it.

Click the button and a save file window will open. Simply choose where to save it and give it a file name.

Import Selections

You can export your selections to a file, then send the file to others with Betbotpro so they can import.

Hor	ne	Settir	ngs	Instanc	e	Tools	
٦°		8	*	*	٤	8	
aunch new Instance *	Rename Instance	Save Settings	Load Settings	Import Selections	Export Selections	Export to Excel -	

This is good for tipsters who have customers that need the same selections.

When importing you must have the correct race meetings already loaded. All selections should also have been downloaded, ie. rows turn white in colour.

You can also import csv files from other sources or tipsters.

Advanced Importer details

It is invoked by the "Instance->Import Selection" menu item.

Import Selections					×
CSV File to Import Choose File of	r Drag-n-Drop it here				
Character Separator					
🔿 Tab	Comma	Semicolon	O Custom	Custom Characters:	n de la companya de l
Skip first line					
	Import		Cancel		

When you import a new file (from the Choose File dialog or dropping/dragging it inside the form), the bot tries to make two kind of predictions based on the data of the second row (it avoids first row data as it might be a header)

- 1) Predict the delimiter
- 2) Predict the type of data for each column

For now it can predict 3 types:

- i) StartTime (if the second row contains a text with a valid date/time)
- ii) MarketName (if the text can be found under "Market" column on the loaded markets)

iii) SelectionName (if the text can be found on the loaded selection names)

	Market Name	Unknown5	Unknown6	Selection Name	Un
Y	Ludl	2m Nov Hrd	Checked	3.Bullet Street	
Y	Taun	2m3f Sell Hrd	Checked	Helium	
Y	Sthl	1m Hcap	Checked	5. Mixed Message	
Y	Ludl	2m4f Hcan Chs	Checked		

The user can also set the delimiters manually and can set each column's type by clicking on the column header.

nknown6	Selection N	ame Unknown7	Unk	nown8	Matches	
ecked	3.Bullet Stre	Unknown			28/02/2013 16:00:00 Ludl 3. Bullet Street	~
iecked	Helium	StartTime			28/02/2013 16:10:00 Taun 7. Helium	~
iecked	5. Mixed Me	6 MarketName			28/02/2013 16:20:00 Sthl 5. Mixed Message	~
ecked		 SelectionName 			Unavailable	~
iecked		SelectionNumb	ber		Unavailable	~
iecked		MarketId			Unavailable	~
iecked		SelectionId			Unavailable	~
ecked					Unavailable	4

After each change, the grid tries to match a loaded selection which appears under the "Matches" column.

Generally, in order the bot to be able to match a selection, the import file should include a valid selectionId or selectionName column.

The other column types, just make the search quicker or avoid duplicate matches (e.g. when the same selection name is found in winners or place market) or in different markets at the same day.

If there are more than one matches, the user can select the preferred clicking on (x Matches) cell.

If the user clicks Import button, then the matched selections are ticked as usual.

Test cases:

1) Using betbotpro "Export Selections" feature. The produced file can be imported successfully if the users set as "SelectionId" the 4th column

2) Using betbotpro "Export to excel" and then save a Tab delimiter file from excel. The produced file can be imported successfully automatically (the bot identifies the selectionName column)

3) Using the csv file from The Bet Plan, selections are imported.

Export Selections

You can export your selections to a file, then send the file to others so they can import.

Good for tipsters who have customers that need the same selections.

When importing you must have the correct race meetings already loaded.

Export To Excel or PDF

The export button allows you to save the days results in a csv or xls excel compatible format.

You can also choose to export in Adobe pdf format by clicking the small drop down arrow.

Tools Menu

Secs Before Bet

This is the time before the race start that the bet is put on, if all criteria/filters are met.

Set from 1 sec to 24hrs.

If using bets below minimum you need to allow enough time to place the multiple bets involved so allow enough time for this. If set to 1 sec then there may not be enough time for the bet to be placed before the event goes in play/running.

Min/Max Number of Runners

This is for horse racing only.

The number of runners in a race must be within this range for a bet to be placed.

Scale none to 100+ runners

Bet Settings / Options		щ	х

Back/Lay Price Ratio

This prevents a bet being placed if the lay price is too far away from the back price. When there is low liquidity this can be a problem, lay prices may not present good value. Generally the closer to the race you bet, the better liquidity and tighter the spread.

Example 1 - Back odds 3.9, Lay odds 4.5, % back/lay ratio 10%

The calculation will be $(4.5 - 3.9)/3.9 \times 100 = 15\%$ - the spread is too big so a bet won't be placed.

Example 2 - Back odds 3.9, Lay odds 4.2, % back/lay ratio 10%

The calculation will be $(4.2 - 3.9)/3.9 \times 100 = 7.6\%$ - the spread is within range so a bet will be placed.

Setting to 0 will disable the back/lay ratio.

Max Stake/Liability

This is another safety feature especially good for stopping stakes getting out of hand.

The bot will stop if the stake size (when backing) or liability (when laying) gets larger than the set figure.

Min/Max Number of Bets

This is a filter for the number of bets to be placed.

If both were set to 3 when using Dutch staking you could make sure all 3 bets are placed or none at all.

Also useful for multiple manual or multiple favourite bets to make sure you only bet if all bets can be placed.

Setting to None default will disable this filter.

Minimum Matched Amount

This is the total amount matched on Betfair for the market/race.

You can use this filter to filter out the races with little money in the market.

If the total amount matched is not greater than the minimum set a bet will not be placed.

0 default will disable this filter.

Min Lay Book /Max Back Book

The book % is the same value as that shown at the top of the Betfair website interface.

If a runner is not included or the liquidity is poor then you will likely get figures not close to 100% which would be standard.

The place market book % can be a lot higher, maybe 300% so you may need to adjust this filter to get bets sent.

Percentage Bank Increase Stop

This will stop the bot when the bank or UK Wallet (Betfair account balance) has increased by a certain %, so you can know the bot will stop every day when the bank has increased by 2% for instance.

This is also useful for when using multiple bots and instances. If the account is increasing due to another bot making profits you can stop all bots based on the % increase.

You can also check SP when loading races, so that you only load races with SP markets.

Load Previous or New markets button

Once the Markets window has loaded you can choose the country you want events/races from.

Once you have chosen the country, choose the event types, like Horse Racing, greyhound racing, Basketball, Cricket, Soccer & Tennis, even Snooker etc. You can pick multiple types although this may not give you the bets results.

Once you have chosen the event you can pick if you want win or place markets (place markets are Each Way markets). You can even pick both. You can also pick Forecast markets or Markets with SP or starting prices available.

e. If you wanted to bet on the Betfair SP prices for a horse to win/lose you would tick Win and SP before loading.

There is a minimum bet size for SP betting, £2 for backing and £10 liability for laying.

See the Betfair help site for more on SP betting http://promo.betfair.com/betfairsp/FAQs_theBasics.html

Unsettled Markets Allowed

This will stop placing any further bets until the last x races have been settled.

If this is set to 1, no more bets will be placed until the last bet result is known.

This is very useful if you're using one of the staking plans especially recovery as delays in results can cause staking to be inaccurate.

0 is unlimited and will not affect betting.

Virtual Wallet Amour	£0.00	÷ .

This will adjust the odds of the selections bet by the number of ticks in the table below.

So if a bet is placed on a selection, the price the actual bet is placed is adjusted by the ticks set so you can adjust above or below the price.

This is great for trying to get better odds or trying to guarantee you get a match by putting the bet on so that there is end money to match the bet at various levels up to and including your odds.

Betfair Price Increment s

Markets

Odds

Price	Increment
$1.01 \rightarrow 2$	0.01
$2 \rightarrow 3$	0.02
$3 \rightarrow 4$	0.05
$4 \rightarrow 6$	0.1
$6 \rightarrow 10$	0.2

 $10 \rightarrow 20 \qquad 0.5$ $20 \rightarrow 30 \qquad 1$ $30 \rightarrow 50 \qquad 2$ $50 \rightarrow 100 \qquad 5$

 $100 \rightarrow 1000 \quad 10$

Example: You want to back as selection at 5.0, but make sure you get matched. If you adjust bet ticks to -3 then the amount is worth -0.3 and the bet will go on at 4.7 or higher. This should allow a good match.

You may want to try and get better odds so you could back a selection at 3.0 with adjust bet ticks at +5 which are equal to 0.25. So the bet will go in at 3.25. Remember you may not get matched as easily though.

The opposite is true for laying. If you want better matches then adjust bet ticks +ve. If you want better value, but risk not getting matched, then adjust bet ticks -ve.

Don't Bet On Reserves

	*

If checked, the bot reloads runner names and silks 1 minute before the off.

It then looks at runner names for "(res)" and at jockey names for "reserve".

A new no bet reason (DONT_BET_ON_RESERVES) appears when the bot tries to place a bet on a reserve selection (and the option is ticked).

Only works with Horse and Greyhound markets.

Get Prices From Back/Lay

Advanced Settings		^ _
Bet on starting price		
Unsettled Bets Allowe	1	÷
Adjust Bet Ticks	0	÷
Don't Bet On Reserve		
Get Prices From	L	•
Keep Unmatched Bet		
Include commission		
Use Profit/Loss From		U
Virtual Wallet Amour	£0.00	\$

This tells the bot where to get the prices from when checking bets and odds levels.

By default if you choose to place back bets B then the prices will come from the Back prices (blue) on Betfairs price grid. If you choose lay bets L then prices will come from the lay side (pink).

lanual Sel ∨ Manu	ial Bet			
Selectio	on B		L	*
Book %		247.83	55.45	
1. Catu	nda Va			
2. Tyrap	Pippa	2.02	14.50	
3. Slane	eyside	3.25	9.80	
4. Glam	orous	2.06	8.00	
5. How	eys Girl	5.00	15.50	
6. Mill C	Gretchen	2.02	8.00	

You can change this so that the prices come from the lay side when backing or the back side when laying etc.

You can also choose Medium which is calculated by taking the midway point between the back and lay prices.

Keep Unmatched Bets In Play

When ticked this will keep any unmatched bets in play.

This is similar to the standard Betfair feature on the website. It only works with In Play Horse racing markets or other In Play Events.

It will not place new bets in play, but only allow bets already placed before the off that are unmatched to go in play and try and get matched.

You could use it effectively with adjust bet ticks to put in offset bets that do not get matched, but then go in play to try and get matched. A sneaky trick which can be quite powerful!

Use Profit/Loss From Results

Provisional winners are estimated from the traded volume after the race has finished and offers superbly quick results. It is not always 100% accurate though so be aware.

Ideal for staking plans like Fibonacci and recovery. Only works on UK horses Win or in-play markets.

Virtual Wallet

When you tick the virtual wallet tick box you can set a virtual bank.

The software will use this bank in all calculations with % bank stakes etc. in live and simulation modes.

So you could have a bank of ± 5000 for instance but set the virtual bank to ± 500 as you don't want to use it all. If you had a bank of ± 100 you could test with larger banks etc.

Bet On xth Favourite

This is where you select the ordered favourite to bet on.

By selecting a race with the left hand tick box and one of the drop down options you can either bet on the 1st, 2nd, 3rd favourite and so on in a race automatically.

The other criteria/filters also have to be met of course.

Number of Favourites

The box below the favourite selection box is the multiple favourite box. So if you select 1 then only that favourite will be selected. I.e. 1st fav + 1 = bet on 1st fav.

Another example is 1st fav + 2 = bet on 1st and 2nd fav. What about 3rd fav + 2? Bet on 3rd and 4th fav.

This is extremely powerful stuff!

Strategies

Stake Plans

The Staking plans have there own tab and you can select the staking plan suitable for your strategy via the drop down box.

If you are placing back bets then the staking plans available will be different to the ones available if placing lay bets.

Bet Settings / Options	Щ.	×
Stake Plans Selections Bet Settings		î
Lay Stake Plans: Fixed stake	•	
C Keep values after reload		
Stake Settings	^	
InitialStake £2.00	÷	

Fixed Stake back and lay

The bets are always placed with a fixed amount depending on the set figure in the drop down box.

E.g. If the fixed stake is set to 1.00 then each bet placed will be £1.00.

You can set this between 0.01 and 1000+ or as big as your wallet will allow....

	[Keep values after reload
Stake Plans: Fixed stake		
Misc		
InitialStake	£10.00	3

Percentage Of Bank Stake back and lay

The 'Next stake' (top left area) is calculated by the percentage of the 'Account Funds' (= Betfair UK wallet).

E.g. If % bank is set to 5% and the funds available are $\pounds100$ then the stake will be calculated as follows:-

Stake = 5% x Account Funds = 5% x $\pounds 100 = \pounds 5$

The % stake setting can be between 0.01 and 100 and is available for backing or laying.

		Keep values after reloa
Stake Plans: % of bank stake		
Misc		
AdjustUpwardsOnly		
PercBank	0.01 %	

Fixed Liability Stake – lay only

The 'Next Stake' is different for each race and depends on the lay odds.

Stake Plans: Fixed liability stake		1
InitialStake	£10.00	1

E.g. If the fixed liability is set to 10 you will limit the loss, should the selection win the race, to £10.

So if the odds at xx seconds before the race were 4.5 then the stake would be calculated as follows:-

Stake = Liability/(odds-1) = 10/(4.5-1) = £2.85

The liability can be set between 1 and 2000 and is only available for lay bets.

Percentage Bank Liability Stake - lay only

The 'Next Stake' is different for each race and depends on the lay odds and bank.

E.g. If the % bank liability is set to 10% you will limit the loss to 10% of the bank, should the selection win the race.

So if the odds at xx seconds before the race were 4.5 with a bank of £1000 then the stake would be calculated as follows:-

10% of bank = ± 100 , Stake = Liability/(odds-1) = $100/(4.5-1) = \pm 28.57$

The % bank liability can be set between 0.01 and 100 and is only available for lay bets.

Aisc		
PercBank	10.00 %	

Recovery Stake – back and lay

The initial stake will be the same as that set in the box. When we have a loss the 'Recovery' tick box becomes activated and the loss to be recovered is shown in Current Values. When the recovery ends, the box becomes unchecked again. During the recovery the number of bets and cycles are shown.

Current Values		
_CurrentCycles	0	
CurrentInRecovery		
_CurrentLossToRecover	£0.00	
_CurrentWinningBets	0	
Misc		
Action	Stop	
Cycles	8	
IncludeLostStake		
InitialStake	£5.00	
LossPercentage	50.00 %	
NoBets	1	

You can set the number of bets to recover the loss % over and also the amount to be recovered over each race. This could be 100% for 1 bet or 50% for 2 bets whatever your strategy requires. The number of recovery cycles determines how many times you try to recover the loss if another loss occurs before the recovery has finished. ie. additional attempts at recovery.

If you set the number of cycles to 0 you will have unlimited cycles i.e. It will keep going. Unlimited cycles can be very risky.

You can also decide to recover the lost stake if necessary by ticking the "include lost stake" option.

Backing with recovery stake can only recover over 1 race instead of a number of races. The stake/recovery depends on the odds of the next selection.

The Action variable allows you to set two options for what happens when the number of recovery cycles is equaled. ie number of additional recovery attempts.

1.Stop 2.Reset

Once the recovery stake has been triggered by a loss, the recovery will finish if the number of recovery bets has been completed. The stake is then reset to the initial stake again and waits for another loss. If we have another loss within the recovery procedure, the next cycle is started until we reach the max number of recovery cycles.

If Stop is selected the Bot will stop when the number of cycles are met. If Reset is selected the Bot will return to the initial stake and reset the recovery ready for another loss. The Bot will continue betting and can start a complete recovery process again.

If you should end the day or your selections with a loss in recovery mode you can tick the Keep Values

After Reload box so when you load races the next day the recovery will continue where it left off.

itake Plans: Recovery stake		
Current Values		
_CurrentCycles	0	
_CurrentInRecovery		
_CurrentLossToRecover	£0.00	
_CurrentWinningBets	0	
Misc		
Action	Stop	
Cycles	8	
IncludeLostStake		
InitialStake	£5.00	
LossPercentage	50.00 %	
NoBets	1	

Of course if the max loss is exceeded at any time the bot will stop.

In the example below you can see a loss occurred on the 13:12 Perry Bar of -3.30. The next stake then for the following two bets will be:

 $50\% \times 3.30 + 1.00$ (stake for current bet) = 2.65

When the two bets have been completed successfully the stake will return to 1.00.

The screenshot below is the old version 4.2 of the software for staking demonstrations

Cycles		3	÷
InitialStak	e	£2.00	÷
LossPerce	ntage	20.00 %	÷
MaxLiabili	ty	£20.00	÷

The loss pot recovery staking system will simply recover a percentage amount of the loss on the next bet.

So if the loss is £10 and the % to recover is 20%, then £2 will be added to the next stake. It will keep adding 20% of the loss until the £10 loss is cleared.

So in theory it will take about 5 bets to recover the loss with 20% set.

It is similar to the main Recovery stake although it will not stop until the loss is recovered or the loss pot is recovered. The main recovery stake will simply do the number of bets set. While this loss pot stake will continue until the actual loss pot is recovered.

So it is good for when you might get a partial match and don't get the full % back on a bet, this will keep going until the loss pot equals 0.

Examples to follow.

Fibonacci Sequence Stake – back and lay

This staking plan is based on the Fibonacci sequence of numbers first devised by an Italian mathematician in the 12th century.

1
8

Some people profess that the Fibonacci sequence can form the basis of a very efficient staking plan, especially when it comes to horse racing.

The Fibonacci sequence works by adding the two previous numbers in the Fibonacci Sequence to get the next stake, i.e. 1-2-3-5-8-13-21-34.

With the Fibonacci sequence your bets go up one step with each loss and you reduce your bets in the Fibonacci sequence, down 2 steps with each win.

Note that every win with the Fibonacci sequence often pays for the two previous losses.

Worked example for the Fibonacci sequence assuming 7 cycles set:

Step1 - bet £10 until you lose, then bet £20

Step 2 - if you win at £20, then return to step 1. If you lose, then bet £30 (cycle 1)

Step 3 - if you win at £30, then return to step 1. If you lose, then bet £50 (cycle 2)

Step 4 - if you win at £50, then return to step 2. If you lose, then bet £80 (cycle 3)

Step 5 - if you win at £80, then return to step 3. If you lose, then bet £130 (cycle 4)

Step 6 - if you win at £130, then return to step 4. If you lose, then bet £210 (cycle 5)

Step 7 - if you win at £210, then return to step 5. If you lose, then bet £340 (cycle 6)

Step 8 - if you win at £340, then return to step 6. If you lose, return to step 1 (reset fib stake or stop the bot) (cycle 7)

Further with each step (also known as a cycle) if the number of cycles are met then you can choose to stop the bot or reset the stake and continue.

Revert After Win allows the sequence to reset to 1x stake instead of 2 steps back as in the original. This option may suit some strategies better.

Maria Staking Plan – back and lay

This is based on a famous thread on a betting forum and basically applies a different stake depending on the odds of the selection.

		Keep values after reloa
Stake Plans: Maria S	itake

HighOdds	15.00	3
LowOdds	11.01	
PercBank	0.20 %	1

It originally applied to a laying system but can be used for backing to.

1) - There are 4 distinct odds ranges. The following is based on a starting bank of £1000

Prices below 3.59: bet to 1% of bank - stake £10 (liability is always under £25 in this price range)

Prices from 3.6 to 7.49: bet to 0.6% of bank - stake £6 (liability is always in between £15.60 - £38.40 in this price range)

Prices from 7.5 to 11: bet to 0.4% of bank - stake £4 (liability is always in between £26 - £40 in this price range)

Prices from 11.01 to 15: bet to 0.2% of bank - stake £2 (liability is always in between £20 - £28 in this price range)

Anything above 15 or 14/1 is left alone.

2) - Depending on making profits or losses, the stakes are increased or decreased on a bet by bet basis in proportion to the betting bank.

For instance, if after a few bets the betting bank is at £1100 then 1% would now be £11 rather than £10.

3) You can adjust the % of bank stakes and odds ranges.

Lay 1-4 Staking Plan – Lay only

The idea behind the Lay 1-4 Staking Plan is that you increase the stake by 1 after a winner (losing lay) to a max of 4 until the deficit on that run is wiped out.

		Keep values after reload
Stake Plans: Lay 1-4		
Current Values		
_CurrentDeficit	-£90.00	
_CurrentUnitStake	2	
Misc		
InitialStake	£2.00	1

The Lay 1-4 Staking Plan is known a gentle loss recovery staking plan. With this staking plan, you know what your largest stake is going to be before you start.

The best way to understand the lay 1-4 staking plan is by using an example.

We will use a start bank of £100 and one unit will be £1. The first bet is always one unit so the first stake is £1. 5% commission is used on the winnings.

The first bet loses. As the bet loses we move up one unit and the next stake is therefore £2.

Again this bet loses.

The next stake is therefore 3. The bet then wins.

The series deficit is now -£13.05. The stake stays at £3 until the deficit is wiped.

Bet no.	Odds	Win/lose	Stake multiplier	Profit	Deficit/Series loss	Cum Profit
1	4.5	L	1	-3.5	-3.5	96.5
	4.5			-3.5	-5.5	90.5
2	7.2	L	2	-12.4	-15.9	84.1
3	3.6	W	3	2.85	-13.05	86.95
4	6.0	W	3	2.85	-10.2	89.8
5	3.6	W	3	2.85	-7.35	92.65
6	7.0	W	3	2.85	-4.5	95.5
7	4.6	W	3	2.85	-1.65	98.35
8	7.5	W	3	2.85	0	101.2

9	6.9	W	1	1.00	0	102.15
10	4.2	w	1	1.00	0	103.1

You can see at bet 9 the stake reverts back to £1 as the series deficit is wiped.

A fairly simple staking plan that will consistently produce better profits than level stakes.

The largest bet is always 4 units. In this example this limit is never reached. However if the losing sequence were to continue the maximum bet would be £4.

Lay88 Staking Plan – Lay only

take Plans: Lay88		
urrent Values		
_CurrentStake	£4.00	
lisc		
InitialStake	£2.00	
StakePerc	20.00 %	

The principle is to recover losses without too much risk.

This plan will add one unit after one loss. If you are betting 10 units, then the next bet (only after a losing bet) would be 20 units.

After one win the stake will stay the same if the last stake is the same as the starting stake, or will decrease by the % if the last stake was bigger than the start stake.

In this case 20% would reduce the stake by 1/5 every bet until equal to the start stake.

Bet	Stake	Result
1	10	loss
2	20	win
3	18	win
4	16	win
5	14	win
6	12	win
7	10	win
8	10	win

If you want to use this plan it's advisable that you have a bank with 100 times the 1st stake to be comfortable. I.e. A stake of 10 would need a bank of 1000.

Custom Multiplier Stake – back and lay

This is a customisable multiplier stake.

	C	Keep values after reloa
Stake Plans: Custom Multiplier		
Current Values		
_CurrentIndex	1	
Misc		
InitialStake	£2.00	
Multipliers	1; 2; 3; 4	-

•		\$ ×
	3	¢ ×
	4	¢ ×
*		¢ ×

Set the initial stake, in this case 2. Then on every losing bet the stake increases by the amount you set. In this case 1x, 2x, 3x, 4x etc.

Similar in nature to the Fibonacci stake but you choose the way in which the stake increases.

The stake would be 1, 2, 3, 4 etc, when you get a winning bet the stake resets to initial stake.

If you reach the end of the sequence it will keep going on the last multiplier until a win.

Target Profit Staking Plan – back only

This staking plan is very simple and useful. The stake is calculated by dividing the target profit by the selections odds.

Stake Plans: Target profit		
urrent Values		
_CurrentLoss	-£90.00	
Aisc		
InitialStake	£2.00	
RecoverLoss		

Target profit = 10, odds = 4.5, so stake would be 10/(4.5-1) = 2.86

If the horse then won you would win £10.

You can also choose to recover the loss from any losers by ticking the recover loss option.

A good example is below:

The screenshot below is the old version 4.2 of the software for staking demonstrations

Dutching Staking Plan – back only

Current Values	0	
_CurrentCycles	0	
_CurrentInRecovery		
_CurrentLossToRecover	£0.00	
_CurrentWinningBets	0	
Aisc		
Action	Stop	•
Cycles	3	3
InitialStake	£2.00	3
LossPercentage	20.00 %	3
MaxBook	90.00 %	3
NoBets	5	1
Recovery		

Example based on £100 stake:

Selection 1 @ 1.83 = 54,64 % (1 divided by 1.83 odds) Selection 2 @ 5.90 = 16.95 % (1 divided by 5.90 odds) Selection 3 @ 9.00 = 11.11 % (1 divided by 9.00 odds)

Total £82.70 or 82.7% chance of winning leaving a profit of £17.30 if one of the selections wins.

The book is the total percentage 82.70%

In short the Total Book is always to 100% and the Book of the selections should always be less than 100% so always shows a profit if one of the selections wins.

You select how many selections i.e. 2 or 3 or more. The selections can be done manually or by using multiple favourite's option. The bot calculates the % for each selection to give the stake.

There is also a filter for total Dutch book - Max Book % so all dutched selections must be less than this or a bet is not placed.

Stakes are recorded in the Market Bets window at the bottom.

You can use this staking with Max Number of Bets/Min Number of Bets to make sure only the exact number of bets is placed. So if you had 3 selections to Dutch and set the min and max bets to 3, then all 3 bets have to be placed or none at all will be placed. A bit like a fill or kill option.

You can also choose to use recovery which will recover the previous loss on the next bet. You can choose to recover a certain % of the loss and choose the number of additional attempts at recovery should you get another loss ie. No. cycles.

You can also select to stop or reset the stake once the no. of cycles has been reached.

Recovery	

WARNING: If the dutch book % of the selections approaches 100% then stakes can get very large.

We want a certain fixed profit if any of the horses win. That is what this stake is about.

So say we want a Set Profit = £10

We calculate as per 2) below. We know total probability so we calculate Turnover = (Set Profit x 100)/ total probability

Then the stake for each horse = turnover/odds, so which ever horse wins gives us a return of £10 or which ever profit is set.

1) The formula is based on the fair bet percentage of 100%. For instance, we wish to back three runners in a field of six with the respective odds of 9/4, 3/1 and 8/1 (3.25, 4.00 and 9.00).

Look up the decimal probability values and you will see that these odds equate to decimal values of 30.8% (9/4-3.25), 25.0% (3/1-4.00) and 11.1% (8/1-9.00).

Add these figures up and we get 66.9%.

Thus our profit margin is 100 less 66.9 (100-66.9=) which gives us 33.1%. This is our profit margin.

2) Next we must equate these decimal probability figures to stakes. So multiply the profit required by 100 (fair bet percentage) and divide by the profit margin, in this case 33.1

£10 (profit required) x 100 (fair bet percentage)/33.1

This gives us a figure of 30.21 which is the turnover.

Now, we know that the respective decimal probabilities were 30.8, 25.0 and 11.1; so next we must multiply the turnover amount by each decimal probability to get the required stake.

30.8% x 30.21=9.30 25.0% x 30.21=7.55 11.1% x 30.21=3.35

So, the respective stakes at the odds given (rounded up for ease of use) are as follows

£9.30 @ 9/4 or 3.25	Win returns:	£30.23	Profit: £10.21
£7.55 @ 3/1 or 4.00	Win returns:	£30.20	Profit: £10.18
£3.35 @ 8/1 or 9.00	Win returns:	£30.15	Profit: £10.13

Total Outlay: £20.00 Min Profit: £10.00

The max dutch book % is simply the probabilities of the selections you are dutching added up. So you can limit the total odds of the group of selections you bet on.

In the above example the max book would be 30.8% + 25% + 11.1% = 66.9%, so the max book would allow the bet. If the Max dutch book % was set at 65% then the bet would not go on. The same applies to min dutch book filter.

You can also apply recovery to the dutching stakes. Just tick the recovery tick box, set the number of cycles, the % to recover of the loss and the action to stop or reset when the number of cycles or additional attempts at recovery

have been met.

D'Alembert Staking Plan - back only

Back Stake Plans:	Da'Lembert	▼
Current Values		~
_CurrentRec	overy	0
_CurrentUni	ť	1
Misc		^
InitialStake		£2.00
ResetLimit		10 🗘

WARNING, the D'Alambert staking plan could require infinite stakes, so limits need to be set other wise this could see you blow the bank pretty quickly.

The D'Alembert staking plan is sometimes known as the pyramid system and was devised by the French mathematician Jean Le Rond D' Alembert (born 1717) and so took his name D' Alembert for obvious reasons.

The D'Alembert Law of Equilibrium theory, supposes a balance of successes and failures over a long series of specific events, like horse racing or casino games.

The plan requires you to increase your stake by one unit after a loss and decrease your stake by one unit after a win.

The intention of the staking plan is to end up at the beginning of the sequence but each time making at least one unit profit.

In an attempt to simplify the D'Alembert process the following example assumes level stakes and level odds:

#On the first bet you play £10 win, bet £10 - if you lose, bet £20

#if you win at £20, next bet £10 - if you lose, bet £30

#if you win at £30, next bet £20 - if you lose, bet £40

#if you win at £40, next bet £30 - if you lose, bet £50

#if you win at £50, next bet £40 - if you lose, bet £60

#if you win at £60, next bet £50 - if you lose, bet £70 and so on

A typical D'Alembert staking sequence could be as below:

#bet 1 unit and you lose -1 unit

#bet 2 units and you lose -2 units

#bet 3 units and you win +3 units

#bet 2 units and you win +2 units

#sum total of units + 2 units

Profit Per Race Staking Plan - back only

Bac	ck Stake Plans:	Profit per Race	•	Keep values after reload
	Current Values	;		^
	_InitialTarge	et	£2.00	
	_lsFirstBet		5	Z
	_TotalTarge	t	£2.00	
	Misc			^
	InitialStake		£2.00	÷

The aim of the Profit Per Race staking plan is to achieve a target profit per race. This could be for instance $\pounds 1$ or 1 point per race.

Once you have set the value for each point it cannot be changed during the betting sequence.

The system works on the assumption that a winner is always just around the corner, no matter how long your losing run is.

For example if we had ten losers in a row, and each point was worth £1, then the stake for the eleventh bet would be to recover £11, £1 for each race.

It is very important to consider the risks before deciding upon your final settings, as sometimes there is not a winner around the corner.

An example of the system in operation is as follows:

You set the first target by adjusting the Initial Stake accordingly.

Race No.	Target per Race	Target + Loss	Odds Stake ResultWin	Loss Running Total
1	1	1	3.0 0.5 L	-0.5 -0.5
2	2	1.5	3.0 1.25 L	-1.25 -1.75
3	3	4.75	3.0 2.38 L	-2.38 -4.13
4	4	8.13	3.0 4.07 L	-4.07 -8.2

5 5 13.20 3.0 6.60 W 13.20 5.0

When the target profit is reached, the sequence resets and starts again.

As you can see, in race 5 the target profit of 13.20 points was reached. At this point all the profit is withdrawn and the sequence starts again with 1 point as the target.

To calculate the stake, simply divide the figure in the Target + Loss column by the odds of the next selection (minus -1). If you then go on to win at 3.0 or over you will recover ALL previous losses and give the expected profit of $\pounds 1$ per race.

In itself, this is a very powerful staking plan and if you can work out your optimum variables, you can very often turn a negative betting sequence positive.

To set your minimum odds for the selections just use the Selections odds range on the Selections tab. This example can be seen below showing that in Race 5 the profit was reached.

We were selecting 1st favourites on the UK Greyhound market above 3.0. The % of bank stake was set to approx £1 level stakes.

AdjustUpwa	ardsOnly	
AverageOd	ds	4.00
PercBank		2.00 %

A good description of the retirement staking plan can be found here:

http://www.grandstand.com.au/retirementstakingplan/

First you need to set the average odds of the winning selections in your system.

The dividor is then set by doubling the average winner odds. 4.00 in imperial odds is 4 minus 1 or 3/1. So the divisor is 6 as can be seen above

as can be seen above.

You then set the % of the bank you want to stake, usually 1 or 2 % of the bank.

Say we start with a large bank of $\pounds 10000$, then 1% is $\pounds 100$.

The Target is then arrived at by multiplying the divisor by the stake = $6 \times 100 = 600$.

All losses are added to your target. If you lose 6 in a row then increase the divisor by 1 after each additional loss.

Here is an example:

To Be Completed Soon

Accumulator Stake – back only

-

This is a very powerful staking system. You can basically roll up the win for a bet and place the lot on the next bet, as many times as you wish.

Of course for it to win you still need winners. But it gives you the opportunity to take the other side of all those people laying the favourite or 3rd fav.

How many times do you see those lose 3 or more times in a row?

The number of WinnerBets set will determine the number of consecutive bets where the stake and winnings will be put onto the next bet.

So the CurrentAccumulatorOdds or total odds is the number of bets times the min odds set in the odds range.

125.00	
£0.00	
0	
£0.00	
\checkmark	
£1.00	
3	
	£0.00 0 £0.00 £1.00

So if min odds are 5.0 and the number of bets 3 then the cumulative odds will be $(5.0 \land 3) - 1 = 5 \ge 5 \le 125 - 1 = 124$.

So if you get 3 bets in a row with winners it is like hitting a 124/1 winner.

Adjust last bet will do the following. The last bet stake will depend on the actual odds of the selections.

So if the selections odds are actually 5.5, 5.4, 6.0 then it will work out as follows:-

 $5.5 \ge 5.4 = 29.7$ and to achieve 125 then the stake on the last bet can be a lot less and you also save winnings and keep profit perhaps.

Example without adjust last bet:

1st bet = stake £1 x 5.0 =£4 + £1 stake back = £5

2nd bet = stake $\pounds 5 \ge 5.0 = \pounds 20 + \pounds 5$ stake back = $\pounds 25$

3rd bet = stake £25 x 5.0 =£125 -1 = £124 total take.

Example with adjust last bet:

1st bet = stake $\pounds 1 \ge 5.4 = \pounds 4 + \pounds 1$ stake back = $\pounds 5.40$

2nd bet = stake $\pounds 5.40 \ge 5.0 = \pounds 21.60 + \pounds 5.40$ stake back = $\pounds 27$

 $\pounds 124 - \pounds 27 = \pounds 97$ remaining to achieve. So if odds of last selection are 6.0 then

 $3rd bet = stake = \text{\pounds}97/6\text{-}1 = \text{\pounds}19.40 \text{ x } 6.0 = \text{\pounds}97 + \text{\pounds}27 \text{ stake back} = \text{\pounds}124$

So we save $\pounds 27 - \pounds 19.40 = \pounds 7.60$ and if we lose our last bet we actually finish with a profit of $\pounds 6.60$ as all we have lost is the original stake of $\pounds 1$ in theory.

When we have losing bets the loss is added to the next bet, but because the effective odds are 124/1 we can divide the loss by 124 so the increase on

each bet is very small allowing us to run a long time without increasing the stake hugely.

Genius!

Example: Here we have min odds set to 3.0 giving us effective odds of 26. (3x3x3 = 27 - 1). We were selecting traps 1 and 3 on the greyhounds using the multiple trap strategy.

Keep Values After Reload

Tick this box if you use recovery staking or other staking and you want to keep the recovery/staking position from yesterday or the same day.

It will remember the amount, the number of bets and cycles status of the recovery process.

You can tick this after you have loaded new events and it should still remember the status from before.

Strategies

The strategies option is a new development to apply some powerful strategies.

Although we call them strategies they are just another way of selecting automated selections.

All the usual filters and staking can be applied like odds range limits etc. Just select the races you want the strategy to apply to.

Strategies will work on both greyhounds and horses, maybe also some other events.

When a strategy is selected the ordered favourite selection process is disabled.

Simply select a strategy via the drop down menu on the selections tab.

Trap/Saddle Cloth Sequence Selection

This allows you to set an ordered repeating trap (dogs) or stall(horses) sequence.

So you can bet on say trap 3, 6, 4 then repeat again 3, 6, 4.

You can use this with the usual available staking plans, Very cool!

Bet Settings / Options		Щ	×

Here is another example with backing traps 1, 3 and 6.

Multiple Favourite Selections

The Multiple Favourites strategy allows you to select any favourite in any order.

So you could bet on 1st, 3rd and 6th favourites, or 3rd and 7th favs etc. Any order you wish.

Here's an example below on the Australian greyhounds.

Last Trap/Saddle Cloth Selection

This will place a bet on the last winning trap number. So if in the last race trap 5 won, then the next bet will be put on trap 5.

There is also an option to wait for two winning traps in a row, so if we had two trap 5 winners in a row the bet would be placed on trap 5 again.

Bet Settings	/ Options				Щ
Stake Plans	Selections	В	et Settings		
Last trap s	election			-	·
Wait fo	r two in a row				1
Use as f	irst win trap		None	÷	

This is usually used when placing lay bets.

The first trap to bet on is just for starting the bets off so we can get the first winning trap of the day.

The last trap used is taken from the last race bet on or the last race ticked. Use with normal staking plans.

All Trap Selection

This will simply place a bet on all traps available on the greyhound markets.

For laying if a loss occurs then the amount of the loss is added to the stake on the trap that last won or created the loss.

It's a test strategy with recovery built in. For backing it will simply place a bet on all traps.

Bet Settings /	Options		щ	Х
Stake Plans	Selections	Bet Settings		
All trap strat	egy		•	
			_	Ш

1st Selection Strategy

This will select the 1st selection in the odds range, or you could say the 1st favourite in the odds range.

So if the odds were set to between 4.0 and 6.0 then if there were 2 or 3 selections in the range at 4.4, 4.8 and 5.5 only the first at 4.4 would be selected.

The actual favourite may be at 3.0 for instance but will be ignored.

Results

In simulation mode the profit/loss is calculated and estimated from the winner result. So if a winner is missing or delayed there will be no profit/loss figure which can mess with staking and unsettled bets etc.

In live mode the profit/loss comes from your account when it is settled. So it does not matter if the winner is known or not.

Sometimes sim mode results are slower than for live mode results.

By default the results come from <u>rss.betfair.com</u> or directly from the Betfair API but they do not always have results for Aus/NZ races etc. and often the results can be slow or delayed.

By choosing Use Profit/Loss From Results you can often get faster results from in play events/races.

You can also get good results here if you need to check.

Time Form

Red Event Rows (Rows Turning Red)

Sometimes Event rows can turn red in colour. There is nothing to worry about here.

It simply means something about the event has changed. If you have Do Not Bet On Reserves ticked under Bet Settings

then it is likely that if the event time or event runners have changed or been withdrawn then the row will turn red to indicate a change.

You can see below that in the forecast market for greyhounds, runner 3 must have been changed or withdrawn as the selection pairings have disappeared.

The software checks a few minutes before the published off time to see if any changes have been made.

Saving Settings

The bot will auto save the current settings and layout when the program is closed. The settings are saved in text files and a database.

Each morning you have to press the 'Load Races' button for the new days races to be loaded.

The software creates some files in the bot directory like 'log.txt', 'properties.cfg' etc. These files have to be left untouched as they are critical for the bot's functionality.

If you should ever have to reset the bot, you can delete the files. But all the previous logs, results and settings will be lost! You could simply move them to another folder for backup.

You can find the files in the directory shown by <u>Tools > Open Application's Data Directory.</u>

Each instance of the software will save it's own settings, so when running multiple bots, if you start a certain instance it will remember the settings from last time.

Reasons for No Bets

You can find out why a bet wasn't placed or if the bot stopped.

If the bot has stopped due to a stop condition like Max Losers then the Running Status label will turn red and the bot status will turn to Stopped.

The window at the bottom of the software will tell you reasons why a bet is not placed.

Reasons for Non Bet Placement

Selection	Type	Time
Selection	Type	Time

You can see below that Salacres Lourdes was a no bet due to the Back/Lay ratio filter. So only one of the two selections had a bet placed.

Running Multiple Bots/Instances

Launching a new instance will launch a completely separate instance of the software. This is very handy for running a different strategy or for betting on different markets.

Click the button on the top Instance menu to bring up a new login screen. You can also click the desktop icon again.

It is possible to run multiple bots on the same Betfair account or multiple Betfair accounts. Be aware of possible data charges from Betfair as per the link in the software.

When logging in always make sure you choose the correct instance. It will remember the last one you used.

You can also create a new instance from Create New.

There is an instance manager where you can edit and unlock any crashed instances. After launching a new instance it will create a new instance name automatically. You can then rename this instance to whatever you like such as greyhound1 or horse strategy 2 or soccer etc.

	🛃 Login :: Untitled#005	×
	Username remember	
Click to enter Instance nanager	Password Use IE Proxy Settings Use Romania Exchange	
	Instance Manager Login	
Click down arrow to choose a previous Instance	*****	
	Registration	
	Resend Token Deactivate Request Trial	
	Register Token	
	Buy Licence expires in 6913 days, 6 hours, 50 minutes.	
	v. 5.27.0.0 Status Se	ervice

Once an instance has been opened the instance is locked and cannot be used until that bot is closed. The last instance opened will also be remembered for next time you login.

This makes running several bots very easy and manageable.

Instance Manager

You can manage the instances you create using the instance manager. Just click on the Instance manager button next to the login button. The drop down also shows the instances you have available.

Create New		Refresh			
Name	Last Account Used	Last Use			
Untitled#001	markscs	1 m, 3 w, 5 d, 6 h, 10 min			
Place Strategy 1	markses	4 m, 3 w, 6 d, 2 h, 32 min			
Untitled	markscs	4 m, 3 w, 5 d, 5 h, 32 min			
Test 2	markscs	Running			
Test 1	markscs	Running			
		Remove			
Name:	Untitled#001	Remove			

You can remove or rename instances from here. If you un-install the program the instances are not removed. So you can un-install and re-install a new version and your settings and strategies will be saved.

Crashed Instances

If the software crashes or the instance seems locked you can unlock an instance by right clicking the Instance and clicking unlocked. It will then show as an Instance in the Instance menu when logging in again.

To Be Successful

For the best discussions on strategies please see the member's forums accessible via the member's area.

Usually the best strategies are the simplest. If you keep your greed under control it's quite easy to make $\pm 10-\pm 15$ a day with ± 2 stakes.

Don't get too carried away and try and make small amounts regularly. You can always increase stakes later on when your strategy proves to be profitable.

There are plenty of tipsters for greyhounds and horses losing or winning their races. You can test their selections in simulation mode and use them if you wish or simply design your own strategy.

For Greyhounds you could use the form on the <u>https://www.racingpost.com/</u> or Betfair to select the dog with the fastest/slowest time.

If the dog with the slowest time is below certain odds then it could be a good lay bet. I'm sure you can think of many more ideas you can test. There are 100's!

Greyhound examples

Lay random traps or a trap series in between odds of say 3 and 10.00

Use small profit targets to start with depending on your stakes (i.e. £10).

You can also try liability staking and fixed staking if you're not keen on recovery which can be more risky.

You could also consider laying favourites only in competitive races i.e. A4/5 or under.

You can also only bet on favourites less than say 3.5. Many of these lose and it can be fairly easy to grab your profit for the day without losing a lot when the favourite does win. Strategies are endless.

Horse racing examples

One strategy that is quite successful is to check with the days racing on Betfair.

Only consider races with 8 or more runners, although it does work with less.

Make sure there are at least 4 horses under odds of 9.00, you can do this in the extra scenarios option.

The lower the odds are the better. Bet on the next horse if the odds are 11 or higher. I tend to use fixed liability with this but recovery can be used as losers are rare.

The sky really is the limit though as there is so many potential strategies that can produce a profit.

Another good one is to lay favourites under 2.0, this limits your liability and they often do not win.

This can be a good one to use a recovery strategy with. When you hit a winner you could stop for the day.

Ie. Lay each for £25 until you hit a winning bet, add your previous loss to the next bet, set your profit target so that one winner will trigger the bot to stop.

The member's forum contains lots of discussions on strategies and techniques. I'm sure you can see the huge potential in the software if used correctly.

Racing Radio Services

If you want to listen to live Horse or Greyhound racing commentary you can do by going to the following link:

William Hill Greyhound Service http://www.bettingshop.tv/shop/index.php?stream=dogs

William Hill Horse Racing Service http://www.bettingshop.tv/shop/index.php?stream=whr

Betfair/Timeform also run a radio service for Horses and Greyhounds https://www.timeform.com/horse-racing/about/timeform-radio

Betfair

You will see in the software there are two links, one called requests per/sec, the other Betfair Charges.

Betfair Charges outlines the charges Betfair can make depending on your betting and usage of the API.

The one of concern is the amount of data requests/sec you make to the Betfair API which has to be lower than 20/sec or they will charge you.

Betbotpro doesn't really get close to this figure so you should have nothing to worry about.

A counter is provided at the bottom of the software to show the number of requests/sec.

You should be careful though if running multiple bots or other software that uses the API as it could add up to more than 20/sec and you could be charged.

The are currently no data charges for the new Betfair API-NG based software

Support

If you need any help or come across any bugs or problems please email us directly.

We prefer email and if you have an issue please send a <u>debug report</u> of the problem.

There are two parts to a debug report. Screenshot & Bot files.

1.) Take a Screenshot of the bot fault or issue, and the settings so we can see the issue.

2.)You can do this by pressing Ctrl or Alt & Print Screen PrtScn keys at the same time to copy the desktop/ window, then paste it to word or paint and send to us.

3.) When creating a debug package the software will also ask you if you want a screenshot.

4.) Create debug file package, Tools Menu and click Create Debugging Package. This will create a zipped folder.

Attach both to an email and send to us with a description outlining the problem.

Email: support at betbotpro dot com
